

Name	Sponge	A
Typology	Side table	
Designer	Calen Knauf	

Description	Assuming the weight and texture of an object to later find out it's nothing like what you expected is a surprising and pleasant occurrence. The Sponge tables hope to achieve this for its observers. Made from carbonated aluminum panels – a common building material – the surface, once painted, becomes completely unrecognizable as metal. The Sponge table's simple construction is designed to highlight the material's use, accentuating its alchemic quality of transforming a standard building material into a luxury good.
